

A heavy duty two piece fastener, totally resistant to vibratory loosening, with high strength, proven performance and reliability. The C6L is available in diameters 3/16", 1/4", 5/16" and 3/8" with a wide variety of head styles and finishes to suit customer requirements. This product is T.I.R. approved

C6L Lockbolts

Features include:

- Vibration Resistant

Provides total resistance to vibratory loosening giving greater reliability in service.

- Fast Easy Installation

Fast installed pins and collars result in lower cost assemblies.

- Versatility

Wide grip range, choice of materials and head style to choose from

- Visual Inspection

Performance is completely dependant on design not operator. Requires only visual inspection so eliminates costly torque checking etc.

- Maintenance Free

Vibration resistance, high strength and visual inspection remove the need for expensive re-tightening or replacement.

Typical applications include:

Commercial Vehicles
Domestic Appliances
Fencing
Automotive
Railway Carriages
General Sheet Metal Fabrication
Heating and Ventilation
Agricultural

specialist fastener systems
